Description:

- This contract will supply filters for all Heating, Ventilating, and Air Conditioning (HVAC) equipment. Filters are changed every January, April, August, and October. The award bidder will be responsible for confirming existing inventory within the building prior to delivery of additional filters. Only the filters required for a single change will be delivered, eliminating the need for storage space and potential damage to stored filters.
- BCPS currently uses non-supported bag, pleated panel, rigid box, polyester cardboard framed, and washable permanent filters.
- This contract will also allow the potential award bidder to perform filter changes on an as-needed basis. This will help to facilitate filter changes in BCPS' 21st Century facilities.
- Anne Arundel County Public Schools (AACPS) is riding this contract with BCPS for their filter purchases. AACPS provided quantities that were included in the solicitation, which allowed for more competitive pricing.
- This contract replaces MWE-802-09, which expired on June 30, 2015. The contract at hand was delayed while waiting to receive vendor reference checks. The filters for the scheduled August service were purchased prior to June 30, 2015, at the lower 2007 contract price. The filters for the scheduled October service will be purchased under this new contract. Current pricing is higher due to time elapsed from 2007 to 2015 and additional services for inventory and installation.

SMALL AND MINORITY BUSINESS ENTERPRISE UTILIZATION AFFIDAVIT

The undersigned as a contractor does hereby make the following Affidavit. I acknowledge the Small Business Enterprise (SBE) and Certified Minority Business Enterprise (MBE) participation goal of fourteen (14) percent for the contract with the Baltimore County Board of Education, and commit to make a good faith effort to achieve this goal. In the solicitation of subcontract quotations or offerors, all SBE and MBE subcontractors and suppliers were provided not less than the same information and amount of time to respond to the solicitations as non-Small Business Enterprise and Minority Business Enterprise subcontractors.

The solicitation process was conducted in such a manner so as to otherwise not place SBE and MBE subcontractors at a competitive disadvantage to non-SBE and MBE subcontractors.

I UNDERSTAND THAT THE FAILURE TO SUBMIT THIS AFFIDAVIT TO THE BOARD OF EDUCATION MAY RESULT IN A DETERMINATION THAT THIS BID IS NON-RESPONSIVE.

I understand that I must submit the SBE/MBE documentation described in the bid documents at the time of bid. Furthermore, I understand that failure to comply with this contract requirement may result in a determination that my bid is non-responsive and therefore would not be awarded to me.

I understand and agree that, if awarded the contract, we will implement the provisions of the above paragraph with respect to subcontracts to be let after the award of the contract, but that such subcontracts will not be let until the Board of Education has reviewed and approved the SBE/MBE submittals.

I understand and agree that, if awarded the contract, I will and do hereby authorize representatives of the Baltimore County Board of Education to examine, from time to time, the books, records and files of this organization to the extent that such data relates and pertains to the affirmative action pursuant to this contract.

I do solemnly declare and affirm under the penalty of perjury that the contents of the foregoing document are true and correct to the best of my knowledge, information, and belief.

- MERV 8

AAF is proud to introduce the longest-lasting MERV 8 pleated panel filter in the market – the MEGApleat M8. Manufactured with a heavy-duty, galvanized expanded metal support grid and moisture-resistant adhesive, the MEGApleat M8 filter is the strongest MERV 8 pleated filter available. The MEGApleat M8 filter's low initial resistance requires less energy consumption, resulting in lower operating costs and energy savings.

AAF Guarantee

Unlike other MERV 8 filters where there is significant performance variability from filter to filter, the MEGApleat M8 filter is designed for the most performance consistency. AAF is so confident about the performance, we guarantee the MEGApleat M8 filter to last longer, be stronger, be more cost efficient than any competitor's MERV 8 pleated filter, and perform to MERV 8 standards throughout the filter life. Contact your local sales representative for guarantee details.

Applications

The MEGApleat M8 filter is designed for use in commercial, industrial, and institutional applications. MEGApleat M8 filters are ideal for turbulent air-flow, heavy loading, and high-moisture systems. MEGApleat M8 filters are directly interchangeable with disposable panel filters, media pads in metal frames, permanent filters, or lower performing competitive filters used in built-up filter banks and side access systems. No modifications are necessary to frames or latches. MEGApleat M8 is also an excellent primary filter to prevent dust build-up on heating and cooling coils, fans, and ductwork, or as a prefilter for higher efficiency filters.

Media

Uniform size virgin fibers are assembled in closely controlled blends to create a media that is consistent in performance. MEGApleat M8 filters promote maximum airflow and dust holding capacity (DHC). MEGApleat M8 filters load at a slower rate increasing the life of the filter. Lower pressure drop and higher DHC means reductions in energy consumption and operating costs. MEGApleat M8 filters are rated MERV 8.

Looking closely at a leading competitor's media, notice the inconsistent fiber sizes and binder that can lead to inconsistent performance and variability.

MEGApleat™ M8 filter media is free of the variations seen in competitor filters, ensuring consistency over the life of the filter.

Premium Construction and Performance

Designed to meet the demands of the toughest applications, the MEGApleat M8 filter offers a totally unitized, die-cut box, beverage board frame with double thickness in the perimeter wall. The MEGApleat M8 filter is extremely strong and durable under difficult operating conditions, including high-moisture applications. MEGApleat M8 filter also has a heavy-duty, galvanized expanded metal pleat support grid laminated to the media pack to increase rigidity and help maintain proper spacing between pleats. Proper pleat spacing ensures maximum efficiency, low resistance, and maximizes DHC.

The media pack is bonded to the frame at all points of contact using moisture-resistant adhesive. This bonding prevents dirty air bypass and promotes even airflow through the media pack. The MEGApleat M8 filter construction process results in a filter which is very stable, with no racking or vibration of the pleats under normal airflow. Pleat stability minimizes the chances of captured particulate shaking loose and re-entering the airstream.

Certified Performance – Insist on Independent Testing

With the MEGApleat M8 filter, MERV 8 classification is documented with test results from an independent, third-party test laboratory. Your sales representative has the results for you to review, just ask. The MEGApleat M8 filter gives you the performance our competitors promise but don't deliver.

Total Systems Solutions

Looking at each stage of filtration is critical to optimizing the efficiency of a HVAC system. When employing a 3-stage system, a MEGApleat M8 filter combined with a VariCel® VXL filter and a MEGAcel™ I HEPA filter will minimize energy usage and cost. When combined with these filters, the MEGApleat M8 filter offers an environmentally sustainable solution that can help you qualify for LEED® Energy and Atmosphere credits, by reducing the fan energy usage associated with HVAC systems.

When a MEGApleat M8 filter is used in combination with other AAF filters, your total cost of ownership is less than competitive systems, as seen in the graph below.

Analysis based on a 3-stage filter system, running 20,000 CFM, over a 2 year time period. Energy costs based on the national average of 0.08 \$/kW-hr. Filter selection was based on the most energy efficient filters available.

SMALL AND MINORITY BUSINESS ENTERPRISE UTILIZATION AFFIDAVIT

The undersigned as a contractor does hereby make the following Affidavit. I acknowledge the Small Business Enterprise (SBE) and Certified Minority Business Enterprise (MBE) participation goal of fourteen (14) percent for the contract with the Baltimore County Board of Education, and commit to make a good faith effort to achieve this goal. In the solicitation of subcontract quotations or offerors, all SBE and MBE subcontractors and suppliers were provided not less than the same information and amount of time to respond to the solicitations as non-Small Business Enterprise and Minority Business Enterprise subcontractors.

The solicitation process was conducted in such a manner so as to otherwise not place SBE and MBE subcontractors at a competitive disadvantage to non- SBE and MBE subcontractors.

I UNDERSTAND THAT THE FAILURE TO SUBMIT THIS AFFIDAVIT TO THE BOARD OF EDUCATION MAY RESULT IN A DETERMINATION THAT THIS BID IS NON-RESPONSIVE.

I understand that I must submit the SBE/MBE documentation described in the bid documents at the time of bid. Furthermore, I understand that failure to comply with this contract requirement may result in a determination that my bid is non-responsive and therefore would not be awarded to me.

I understand and agree that, if awarded the contract, we will implement the provisions of the above paragraph with respect to subcontracts to be let after the award of the contract, but that such subcontracts will not be let until the Board of Education has reviewed and approved the SBE/MBE submittals.

I understand and agree that, if awarded the contract, I will and do hereby authorize representatives of the Baltimore County Board of Education to examine, from time to time, the books, records and files of this organization to the extent that such data relates and pertains to the affirmative action pursuant to this contract.

I do solemnly declare and affirm under the penalty of perjury that the contents of the foregoing document are true and correct to the best of my knowledge, information, and belief.
